

The breast shell insert with active breast massage

OPTIFLOW

Express, gently and efficiently - as never before!

The Optiflow active breast massage insert is made of pure silicone which gently, but actively, massages the areola. This effect stimulates the milk ejection reflex for a comfortable and efficient expressing experience.

Important features at a glance

- Air chamber system with thin windows actively massages your breast
- Gentle massage can make breastmilk flow faster
- Efficient and comfortable expressing experience
- Soft supple silicone
- The 31 mm breast shell is needed for pumping with the Optiflow.
