

Nipple shields

TULIPS

Assists with sucking or latching on problems

The Tulips nipple shields are easy to use and help both full-term and premature babies experiencing sucking problems to grip the breast. In addition, they make it easier for mothers with flat or inverted nipples to get their baby to latch on and can protect sore nipples during breastfeeding.

Important features at a glance

- Intensive skin contact during breastfeeding thanks to the tulip shape
- Soft shaft for the baby's sensitive oral cavity
- Made of thin, odorless and tasteless silicone
- Produced without BPA and latex free
- Practical storage box for increased hygiene, whether at home or out and about
- Is available in three sizes: S (16 mm), M (20 mm) and L (24 mm)
